

DOUBLE BLADE CUTTERS

M-CDC

Strip cutter with two simultaneously guided knives. For the preparation of samples for tensile tests.

This double blade cutter is optimally suited for standard papers.

Available for various strip widths:

- 12.7 mm
- 15 mm
- 25.4 mm
- 50 mm

Metallic cutting device with safety device.

The operator raises the knife and positions the sample. After this, he brings down the knife, whereby the holding-down device touches the sample. Finally, the sample is cut. If the holding-down device doesn't touch the sample for any reason, the safety device ensures that the sample isn't cut.

Weight: 18 kg

Dimensions (W x D x H): 50 x 50 x 15 cm

CUT7 (P40320)

Particular double blade cutter especially designed for very thin papers and plastic films. Cuts papers from 8 g/m² and is used for very thin papers (8-30 g/m²). Very thin plastic and aluminium foils can equally be cut. Standard widths: 15 and 50 mm. Intermediate widths can be delivered on demand. Please indicate the material to be cut when ordering, because the cutter has to be adapted to it.

Weight: 10 kg

Dimensions (W x D x H): 50 x 33 x 9 cm
